Subject: [External] Solar

Hello. I am writing to ask you to please consider avoiding a change to the solar program and net metering. I just finished my installation of solar panels about a year ago. I made decisions based on the net metering program. It seems very unfair to make any changes to the program. We must make radical shifts towards the use of solar and other renewable energy sources. This is not the time to create such a negative impact for the state. Thank you ... Mary
